## Moss Bill Asks Probe For CIA

Deseret News Washington Bureau

WASHINGTON—A resolution which would provide congressional examination of the Central Intelligence Agency was co-sponsored Wednesday in the Senate by Sen. Frank E. Moss (D-Utah).

The measure would set up a joint committee on foreign information and intelligence to be made up of seven senators and Senate representatives. Sen. Moss said Thursday. "We know nothing of the agency's activities. The operation of the CIA is entirely independent of congressional scrutiny."

The joint committee would be similar to the joint committee on atomic energy which deals with the Atomic Energy Commission and other U.S. agencies handling nuclear material.
